EZYHOT RV

NEW

Tankless Instantaneous Hot Water System

- Dry Burning Protection
- Overheating Protection
- Flame Out Protection
- Overpressure Protection

65,000 BTU

Dual Burner Performance

Unlike single-stage burners, the EzyHot du - al-stage burner automatically adjusts heat output as water flow changes. This helps re - duce temperature fluctuations, improve shower comfort and use LPG more efficiently.

Why No Tempering Valve?

The EzyHot is designed to deliver hot water at a maximum temperature of 50°C, eliminating the need for an additional tempering valve. This simplifies installation, reduces components and saves valuable space and money in your RV.

Specifications	
Model	G10FWHCAU
Max Gas Input	65,000 (BTU) - 68.4 MJ/h
Min Gas Input	17.7 MJ/h
Fuel	Propane (LP Gas)
Cutout Size	325mm x 325mm X 480mm Min
Maximum Inlet Gas Pressure	3.50 kPa
Minimum Inlet Gas Pressure	2.50 kPa
Electrical Rating / Voltage	DC 12V, less than 5A
Maximum Working Water Pressure	0.8 MPa
Minimum Working Water Pressure	0.1 MPa
Orifice	Ø1.2 × 5 mm
Setting Temperature Range	35°C–50°C (95°F–124°F)
Net Weight	11.64kg
Working Altitude	0–1372 m (0–4500 ft)
